Software Developer by Career, Open Web Enthusiast by Passion

| Experience

Sr Front End Developer at BabyCenter (via Toptal)

Remote, San Francisco — March 2018 to Present

At BabyCenter, I'm responsible for maintaining and evolving their front end codebase, implementing new projects using latest technologies such as PWA, ReactJS, and also performing third-party integrations with services like Google DFP, Amazon Web Services and Adobe Analytics.

Sr Front End Developer at Translucent Computing

Remote, Canada — September 2017 to February 2018

This was my first remote and international experience. With Translucent team, I've worked in my most amazing software development project ever: a web app for helping child and teen cancer patients, and their doctors, improve their treatment by tracking their symptoms.

Sr Full-stack Developer at Tegra

Sorocaba, Brazil — May 2015 to August 2017

While working there, I matured my technical skills and delivered more than 10 projects for different market segments such as medical, retail, events, products, mobile and others.

| Education

Analysis & Development of Systems Graduation @ FATEC Sorocaba

Sorocaba, Brazil — Graduated in 2018

Front End Specialization @ Caelum

São Paulo, Brazil — Finished in 2014
