Front End Specialist by Career, Open Web Enthusiast by Passion

Experience

Sr Front End Specialist at Chameleon

Remote, San Francisco (US) — August 2021 - Current

I'm currently evolving Chameleon codebase and product, a SaaS that helps companies provide and manage in-product engagement to its users (through user onboarding, feature discovery, support, user feedback & analytics) -- all of that in a unique tool that can be seamlessly integrated into web apps.

Sr Front End Developer at BabyCenter (via Toptal)

Remote, San Francisco (US) — March 2018 - June 2021

At BabyCenter, I was responsible for both maintaining their 20+ years legacy codebases, and completely migrating/remaking it with using modern technologies (PWAs, React/Hooks, GraphQL/Apollo, NextJS, Jest, Cypress) as well as implementing/maintaining third-party integrations (GA, GTM, AWS, Snowplow).

Sr Front End Developer at Translucent Computing

Remote, Toronto (Canada) — September 2017 - February 2018

At Translucent team, I've worked in one of my favorite projects: a web app for helping children and teenage cancer patients (and their doctors) improve their treatment by tracking their symptoms and providing oriented insights.

Sr Full-stack Developer at Tegra

Sorocaba, Brazil — May 2015 - August 2017

At Tegra, I delivered 10+ projects for different market segments (including medical, retail, events, and finance); and also got a solid background on the entire Software Development cycle, from analysis & prototyping, through front end & back end, to delivery & distribution.

Education

Analysis & Development of Systems Graduation @ FATEC Sorocaba

Sorocaba, Brazil — Graduated in 2018

Front End Specialization @ Caelum

São Paulo, Brazil — Finished in 2014

Relevant Info
